EXPERIENCE

Peninsular Research Opearation

JUNE. 2025 – Present
Chennai

JUNIOR SOFTWARE DEVELOPER

- Built an AI-powered analytics dashboard **Data Mocha** where users upload datasets or provide database connection strings to automatically generate interactive dashboards and visualizations using Langgraph multi agent orchestration and Azure OpenAI
- Developed an agentic AI workflow that analyzes structured data, selects relevant chart types, and dynamically renders dashboards using Form.io components reduced manual dashboard generation **upto 90%**
- Integrated a real-time voice-enabled AI assistant using **LiveKit** for speech-based interaction with dashboards and data insights
- Designed dynamic multi-chart visualization support with automated insights generation for diverse datasets
- Improved user experience by **30% enabling** end-to-end no-code dashboard creation through AI-driven data interpretation and visualization

Peninsular Research Opearation

FEB. 2025 – MAY 2025
Chennai

SOFTWARE DEVELOPER INTERN

- Developed a full-stack low-code application platform using Angular, Node.js, and Form.io, enabling users to create and manage dynamic applications within minutes
- Developed scalable REST APIs using Node.js and Mongo Db for AI-powered analytics workflows, following Agile development practices and modular service-oriented architecture.
- Developed a complete e-commerce platform using Angular and Node.js with features including product management, authentication, role-based access control, cart functionality, and order workflows

PROJECTS

PersonaMind AI

Built a custom persona-based AI agent with persistent long-term memory using a **Wiki-style** knowledge architecture , enabling structured knowledge storage, contextual retrieval, and personalized conversational responses. Integrated real-time voice interaction using **Eleven Labs**

Chat Web App

Developed a full-stack real-time chat application using React and Firebase, enabling users to create accounts, exchange instant messages, and manage dynamic chat interactions with cloud-based data synchronization.

EDUCATION

SRM Institute of Science And Technology

JUN. 2021 – May 2025
Chennai

BTECH-CSE

Coursework: Bachelor of Technology in Computer Science and Engineering | CGPA: 9.52/10

Research: Developed a Hidden Markov Model (HMM)-based framework to analyze influential node trustworthiness and behavioral patterns in social networks

SKILLS

Programming Languages: Python, JavaScript, SQL, HTML5, CSS3 , TypeScript , JAVA

AI & Agentic Frameworks: Langchain , Langgraph , AutoGen , Crew Ai, RAG, Prompt Engineering , PineCone

Frontend Technologies: React, Angular , Astro

Backend & Databases: NodeJs , C# , PostgreSQL, MySQL, Firebase , MongoDB

Tools & Platforms : Git , Strapi

Cloud & Devops : Azure, Docker, GitHub Actions

Awards And Recognition

Ai Hackathon 2025 : Won the PRO AI Hackathon by developing an agentic AI solution that optimized large-scale datasets using Retrieval-Augmented Generation (RAG) and enabled intelligent query-based interactions through AI agents
